

# DevOps Engineer

## About Alcatraz AI:

We're an award-winning, Series A startup, backed by Silicon Valley VCs, as well as some of the largest security companies in the world. We are disrupting the \$70B access control industry through facial authentication and artificial intelligence. Our product is a frictionless and secure physical access control platform built with our proprietary full-stack software and hardware that integrates into the existing security infrastructure in corporations. Enterprises choose us to modernize their infrastructure and deliver a touchless and secure solution for their employees.

## Key responsibilities:

- Develop and support CI/CD pipelines and build infrastructure
- Maintain and develop Cloud infrastructure (IaC) with Terraform
- Automate product build and release flow
- Assist for on-prem deployments by improving installation mechanisms, develop the needed tools and struggling with challenges on any level – OS, network, application, etc.
- Actively participating in infrastructure validation and security inspection either on Cloud or on-prem deployments
- Maintain internal infrastructure (VM hosts, automation tools and etc)

## Must haves:

- Experience building and deploying production software applications
- Experience in system and network administration
- Experience in Docker and containerization
- Experience in scripting (Bash and Groovy etc)
- Experience in Jenkins and Jenkins pipelines including script pipelines
- Knowledge and experience in AWS and Terraform
- Deep understanding of Computer Science fundamentals and a strong desire to learn and grow
- Knowledge of CI/CD, monitoring services and site reliability
- Knowledge and experience in Virtualization

## **Nice to have:**

- Experience in micro services approach and architecture, handling, monitoring, etc.
- Experience in Go
- Experience enforcing security best practices to protect data and enterprise applications, meeting the security bar, security toolset.

## **Why You Should Join Alcatraz:**

Alcatraz AI offers a cutting-edge solution that represents the future of physical security access control, highly valued by our customers.

Our startup enjoys strong market momentum and tremendous potential for growth.

We foster a culture of innovation, encouraging builders, makers, and creative thinkers to thrive.

Alcatraz AI is committed to equal opportunity employment.

We know you're already intrigued by the role, but let us share more about the our **extensive benefits and perks package we offer:**
